Rakshita Kumari

Kolkata, India
rakshita0903@gmail.com | +91-7679144006 | GitHub | LinkedIn

Education

Kalyani Government Engineering College 2023 – 2027
B.Tech in Information Technology

Skills

Languages: C++, Python, JavaScript, TypeScript
Frontend: React.js, Next.js, HTML, CSS, Tailwind CSS, Leaflet.js
Backend: FastAPI, Node.js, Express.js, REST APIs, WebSockets
Database: SQLite, MongoDB, Supabase, Prisma, SQLAlchemy
AI/ML: Google Gemini API, NDVI/NDWI Analysis
Concepts: Data Structures & Algorithms, OOPs, JWT Authentication, OAuth2
Tools: Git, GitHub, Postman, Vercel

Projects

MediGuard — Multi-Agent AI Patient Safety Platform | *DevNetwork [API + Cloud + AI] Hackathon 2026* | Live | GitHub

- Built a multi-agent healthcare platform using FastAPI, LangGraph, and Groq LLaMA models to detect sepsis risks and dangerous drug interactions
- Designed an asynchronous SQLite persistence layer with SQLAlchemy for vitals, sepsis alerts, prescriptions, and interaction results
- Diagnosed a deprecated Groq LLM model blocking the pipeline and identified 2 clinical-logic defects through systematic API testing

JalSense — AI-Powered Water Stress Alert System for Farmers | *Hack the Habitat*| GitHub

- Built a full-stack agricultural monitoring system combining Sentinel-2 satellite imagery, weather forecasts, and crop-specific water-stress prediction
- Developed a modular FastAPI backend integrating Sentinel Hub, Open-Meteo, OpenStreetMap Nominatim, and Twilio APIs with OAuth2
- Engineered crop-specific NDWI/NDVI thresholds and built a React + Tailwind dashboard with Leaflet geospatial visualization

DyslexiFlow Lite — AI-Powered Assistive Reading Platform | *AceSAT Education AI-Agent Hackathon* | Live | GitHub

- Built an AI-powered assistive reading platform for K-12 students with dyslexia, ADHD, and visual processing difficulties
- Developed autonomous struggle detection using paragraph dwell time and integrated Google Gemini for contextual reading assistance
- Implemented paragraph focus, reading ruler, text-to-speech, and customizable reading themes using React, TypeScript, and Tailwind CSS

Experience

Full-Stack Developer — Zyptora July 2026 – Present

- Led development of Zyptora's web platform using Next.js, TypeScript, React, and Tailwind CSS
- Designed reusable responsive components and contributed to full-stack application architecture
- Integrated Supabase and Prisma for data management and Zod for schema validation
- Collaborated with the founding team to develop and refine product features and technical solutions

Achievements

- Selected as a contributor for GirlScript Summer of Code (GSSoC) 2026
- Solved 400+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks
